BY PULLING ON THE EARTH THE MOON CAUSES THE EARTH'S OCEANS TO BULGE!!!

THIS IS BETTER THAN STARFISH WARS

AS THE EARTH ROTATES SHORELINES MOVE IN AND OUT OF THE BULGE.

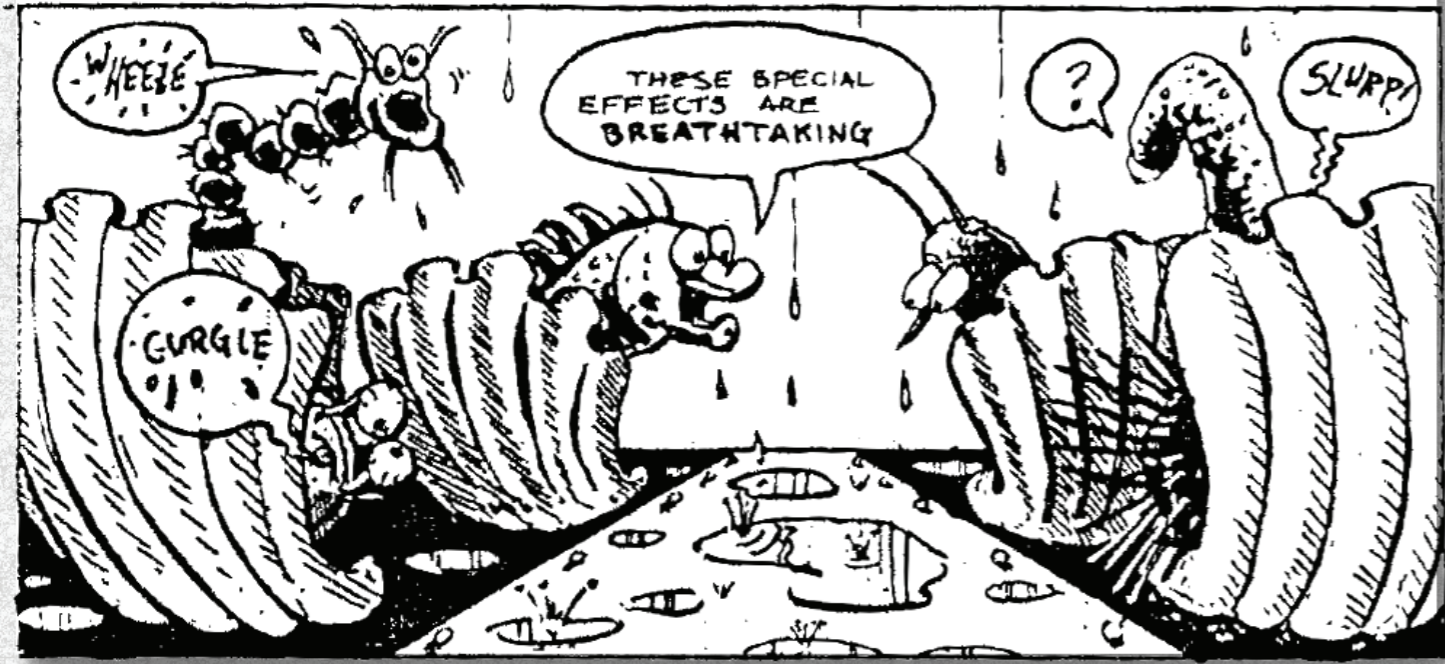

WHENEVER A SHORELINE IS AWAY FROM THE BULGE, A DROP IN THE WATER LEVEL OCCURS KNOWN AS...

... LOW TIDE!

SAY, IS IT GETTING STUFFY IN HERE?

THESE SPECIAL EFFECTS ARE BREATHTAKING

SLURP!

LOOK! IT'S RISING!

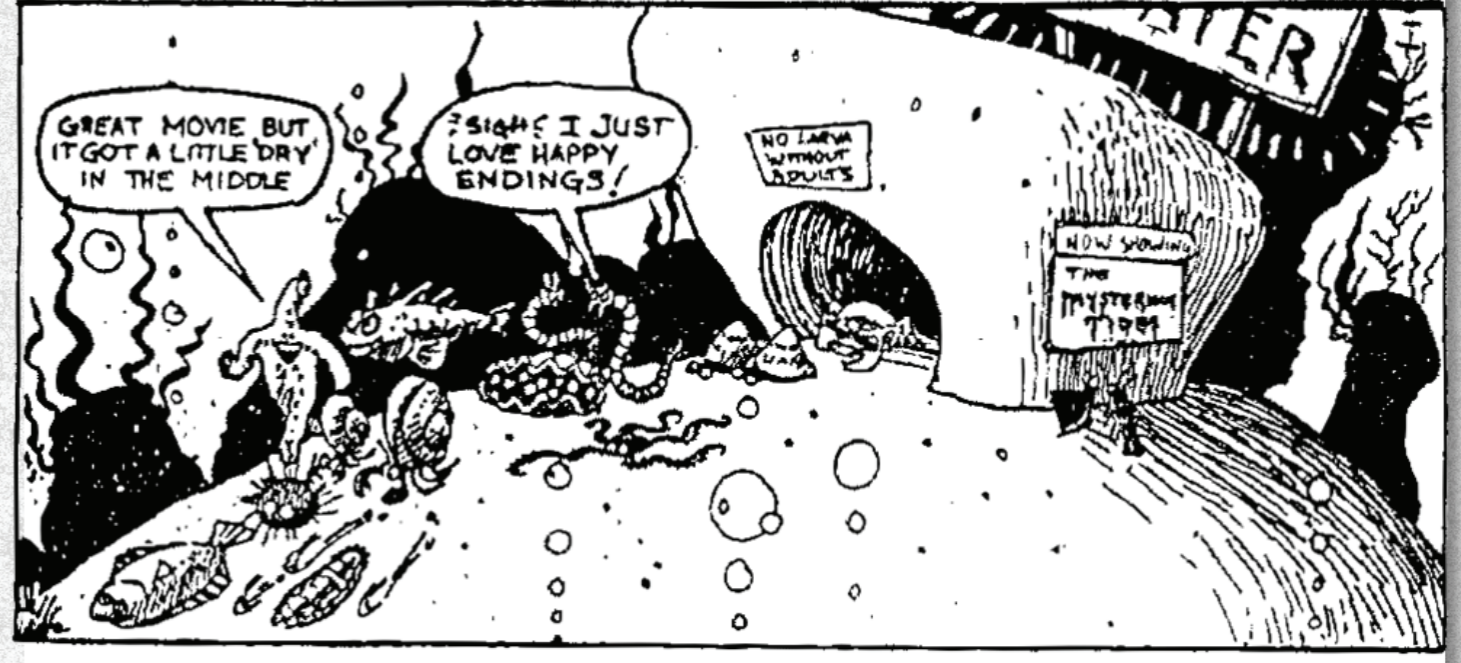

I LIKE THIS PART!

... HIGH TIDE!

WHEE CLAP & CLAP CLAP YEAH! SNAP & POP CRACK CRUNCH SPOOLS KNOCK

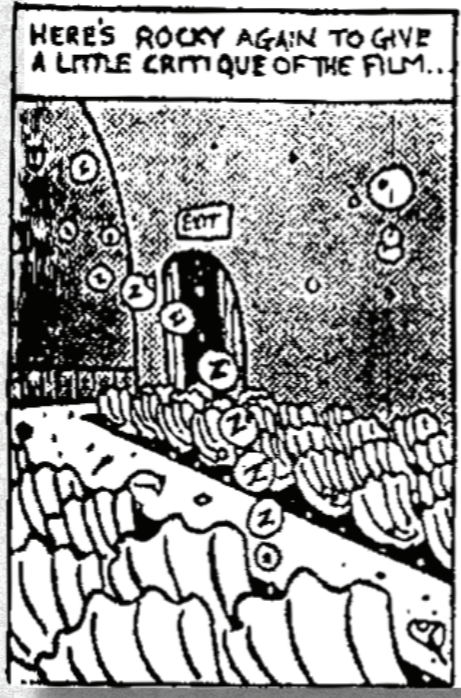

GREAT MOVIE BUT IT GOT A LITTLE DRY IN THE MIDDLE

SIGH I JUST LOVE HAPPY ENDINGS!

NO LARVA WITHOUT ADULTS

NOW SHOWING THE MYSTERIOUS TIDE!

HERE'S ROCKY AGAIN TO GIVE A LITTLE CRITIQUE OF THE FILM...

ER.. AHM!! ROCK?!!

SNORT

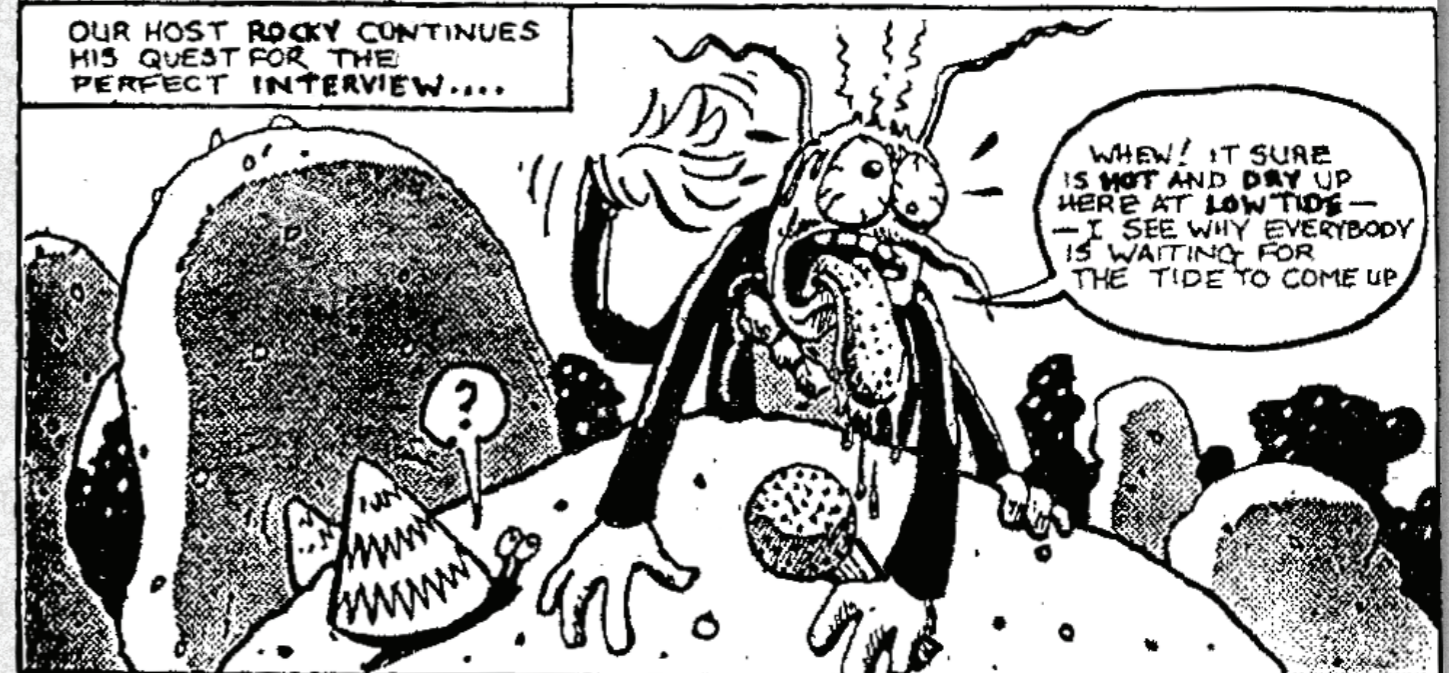

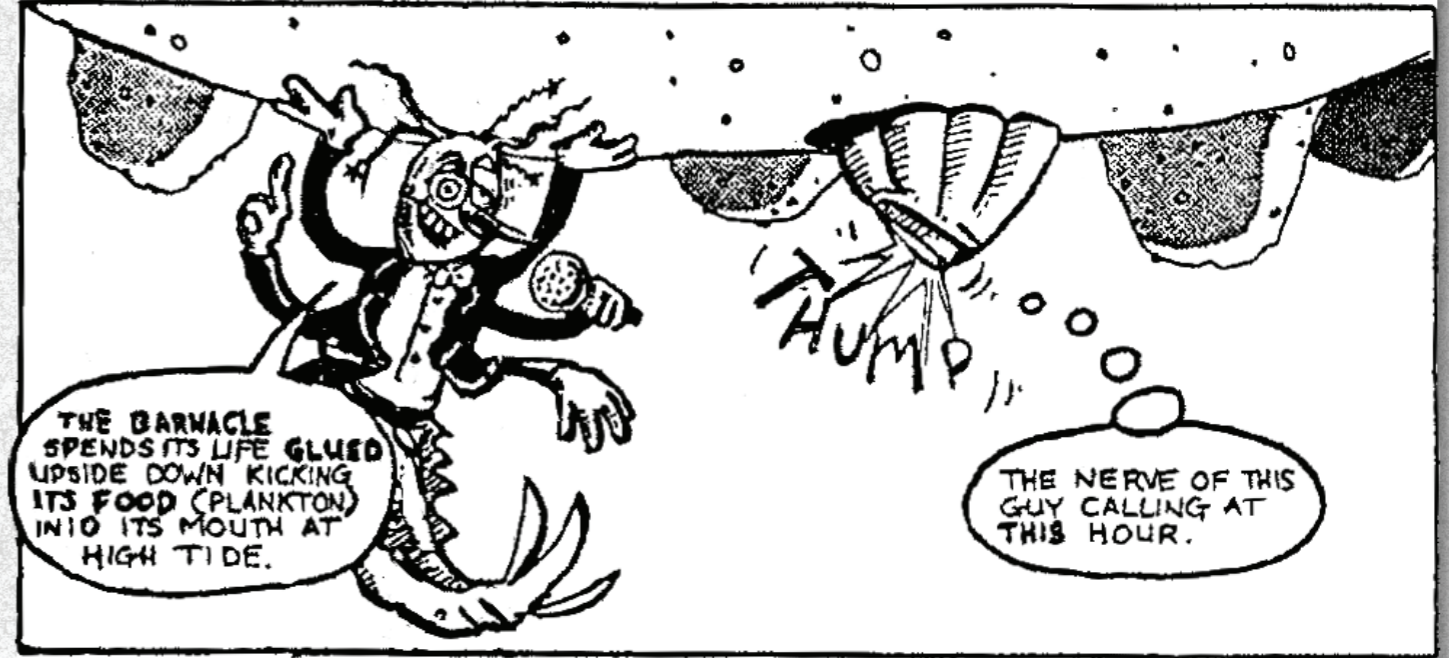

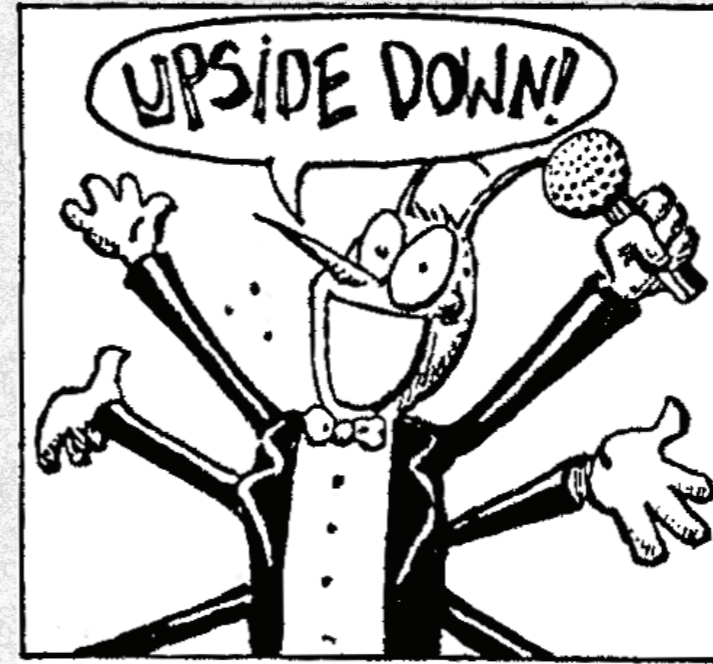

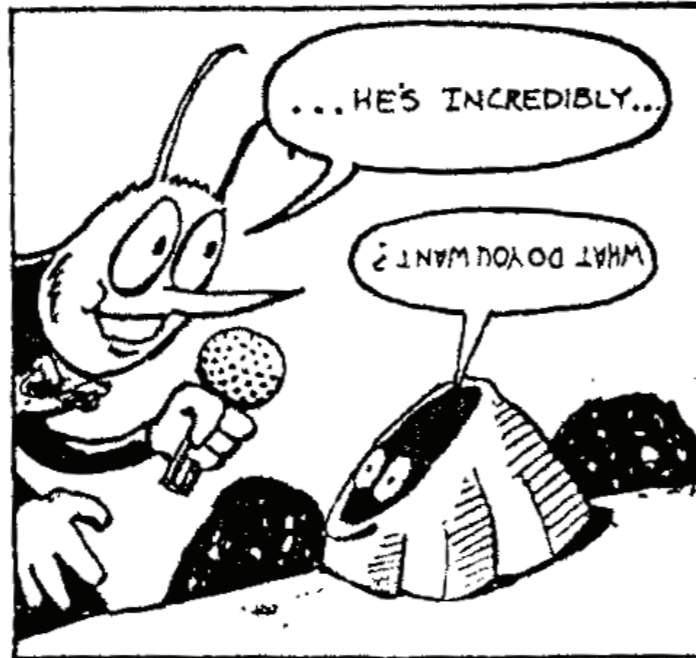

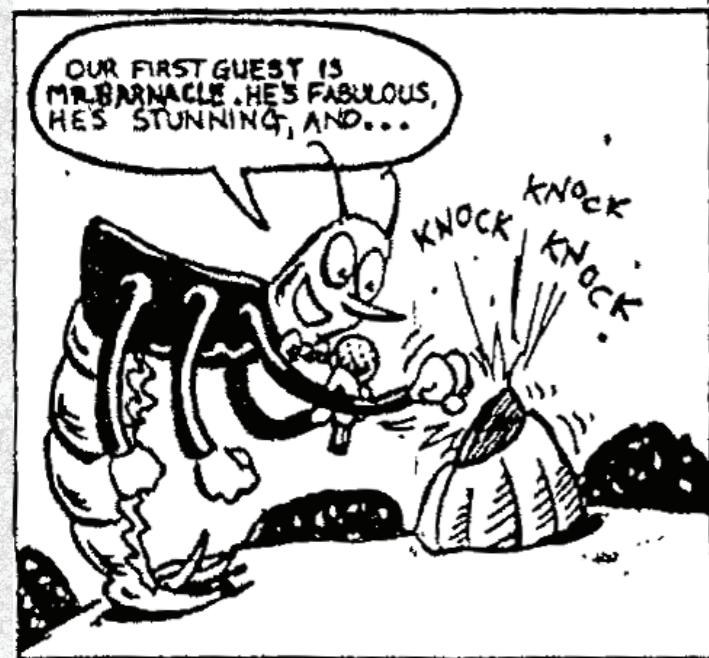

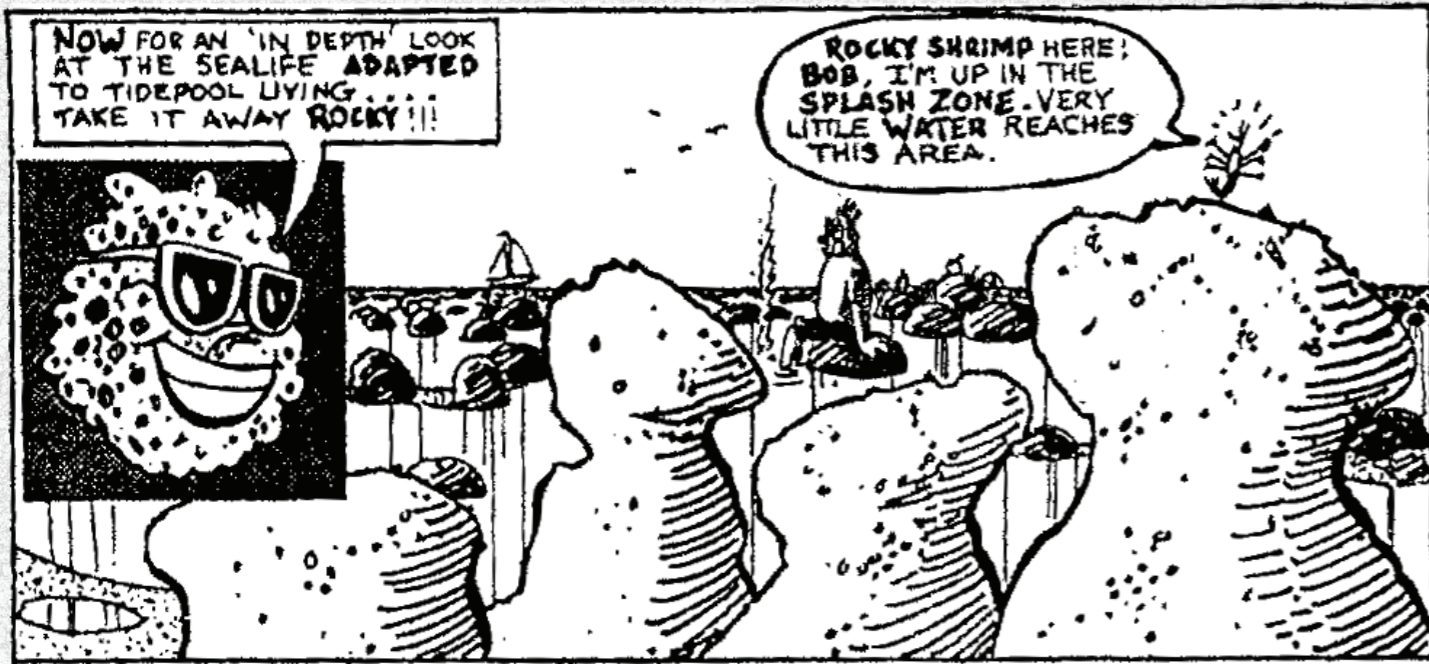

... ROCKY!!!!

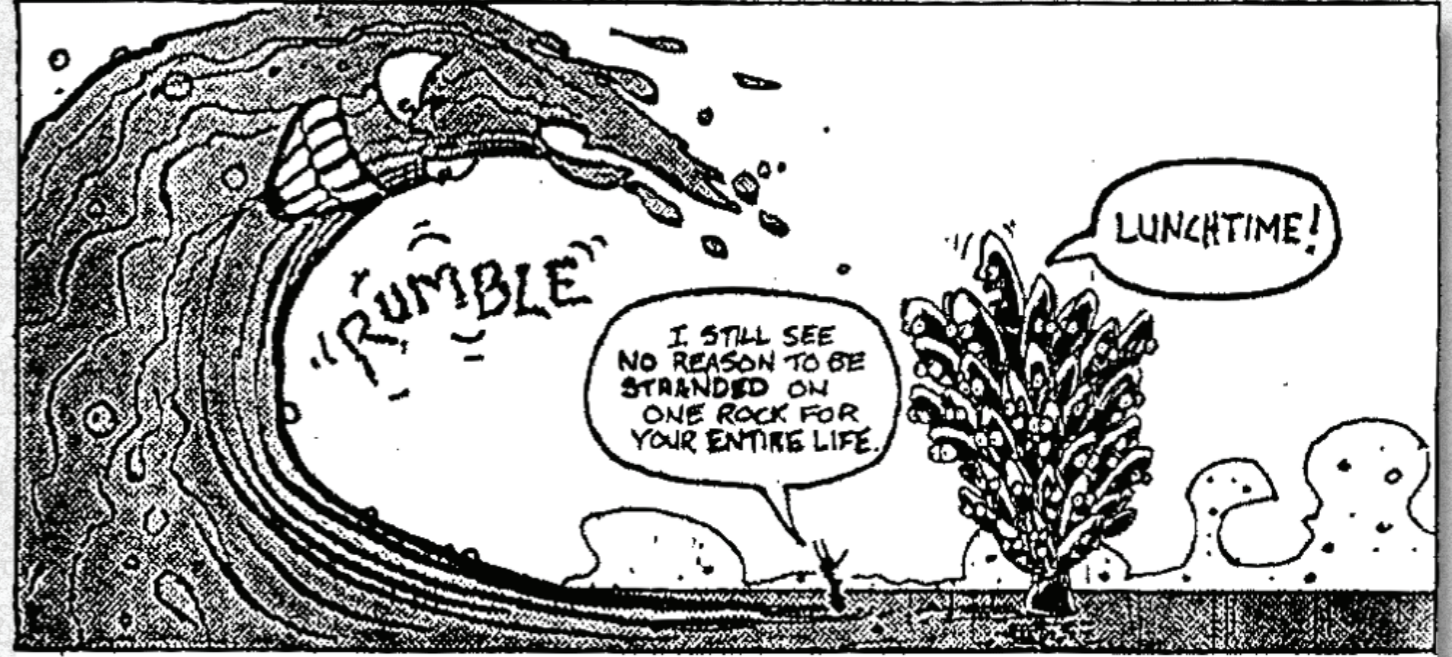

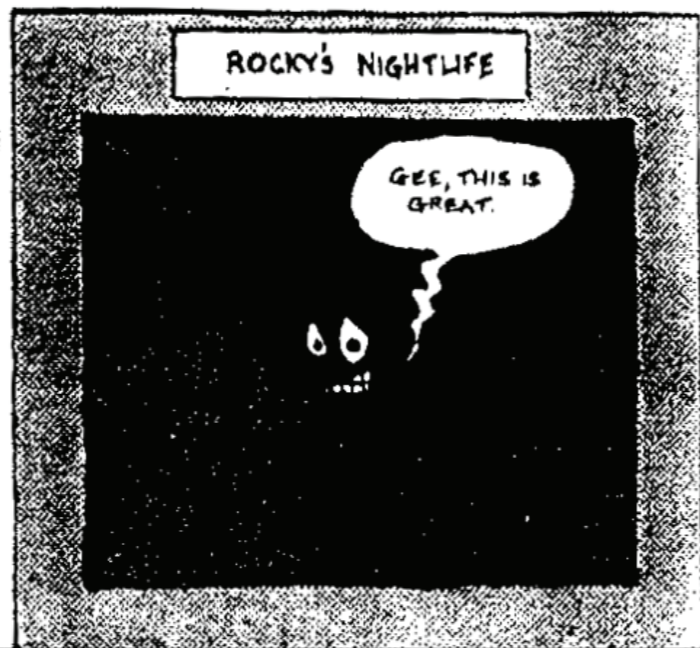

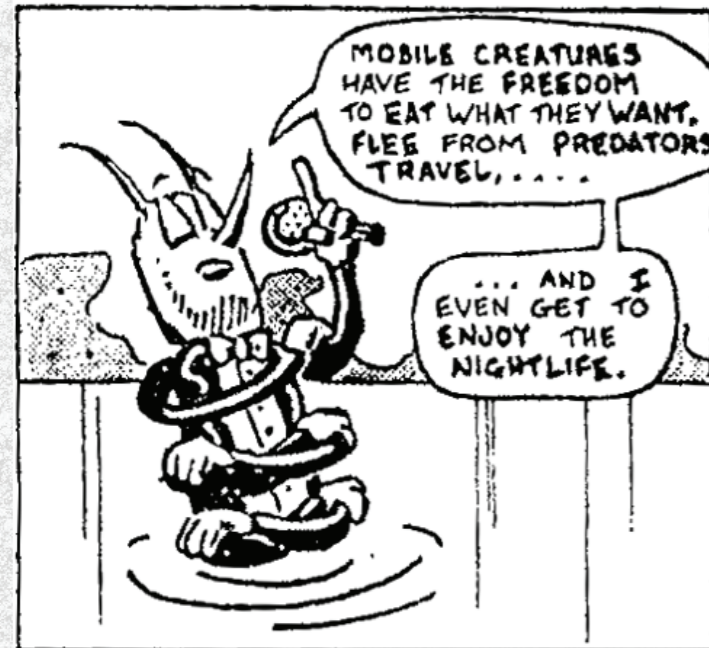

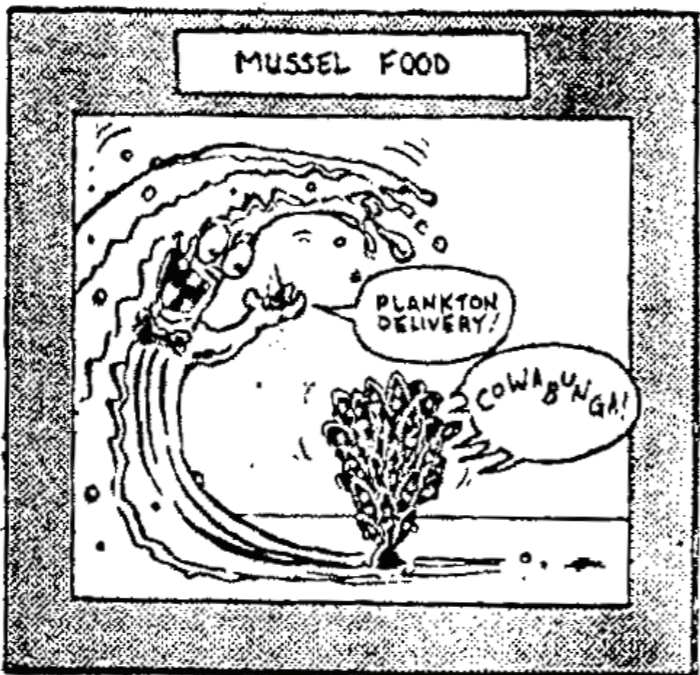

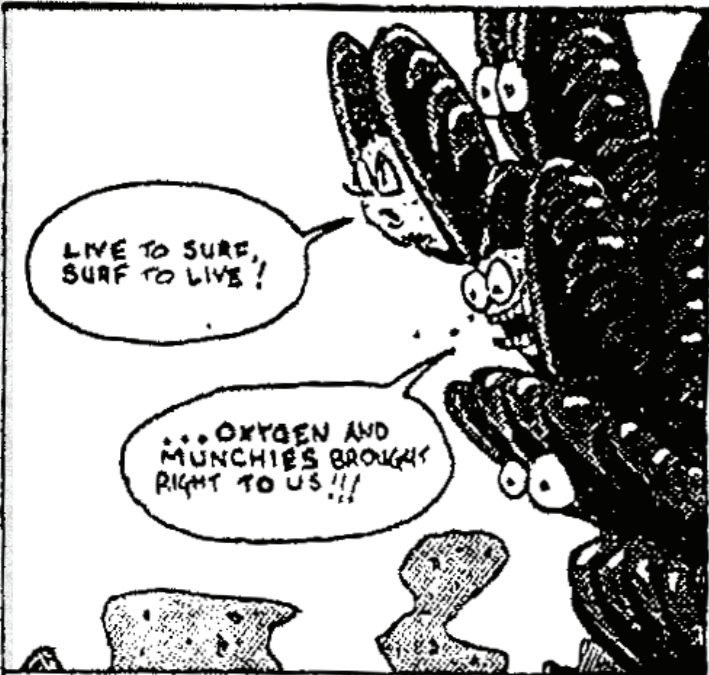

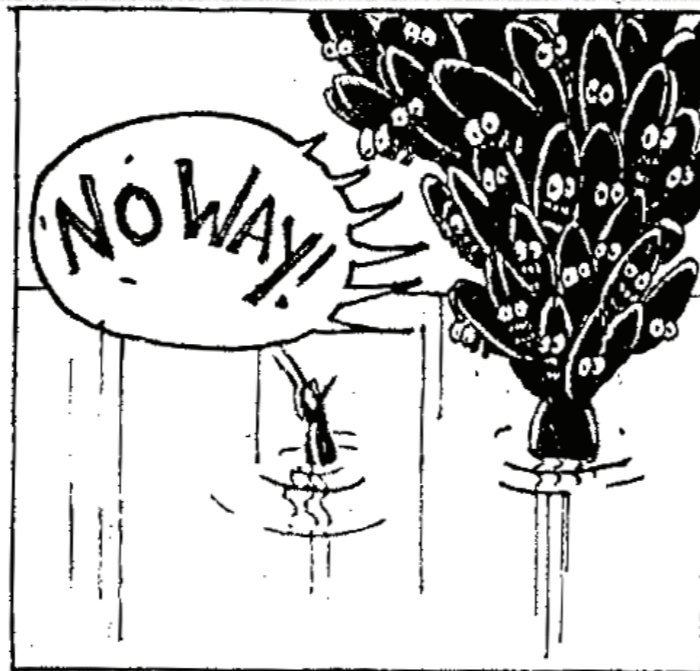

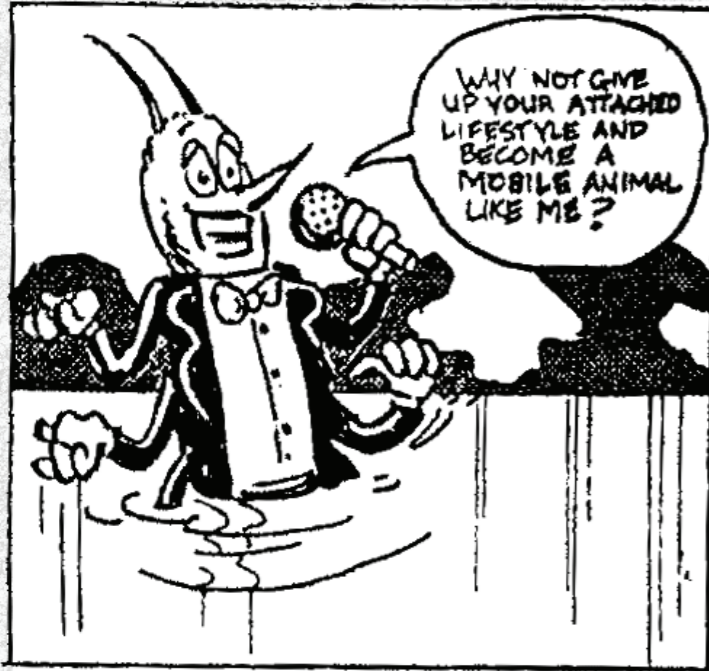

WUH?

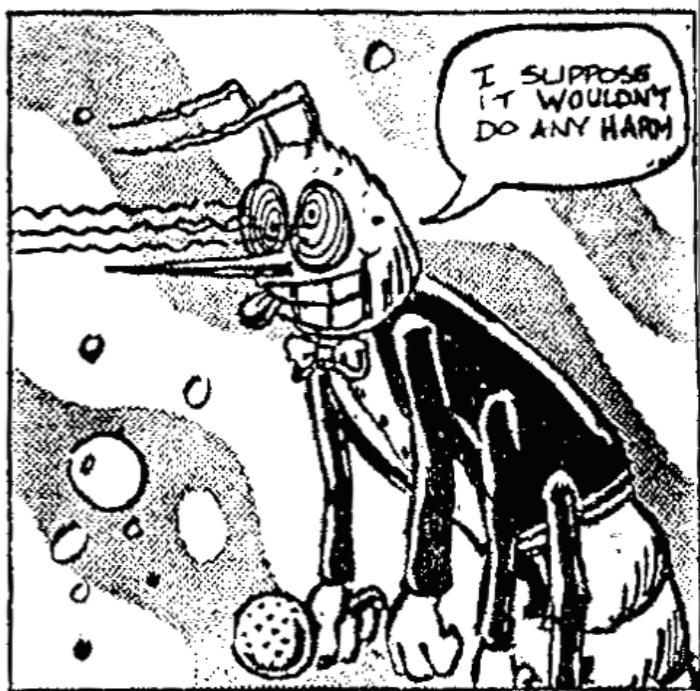

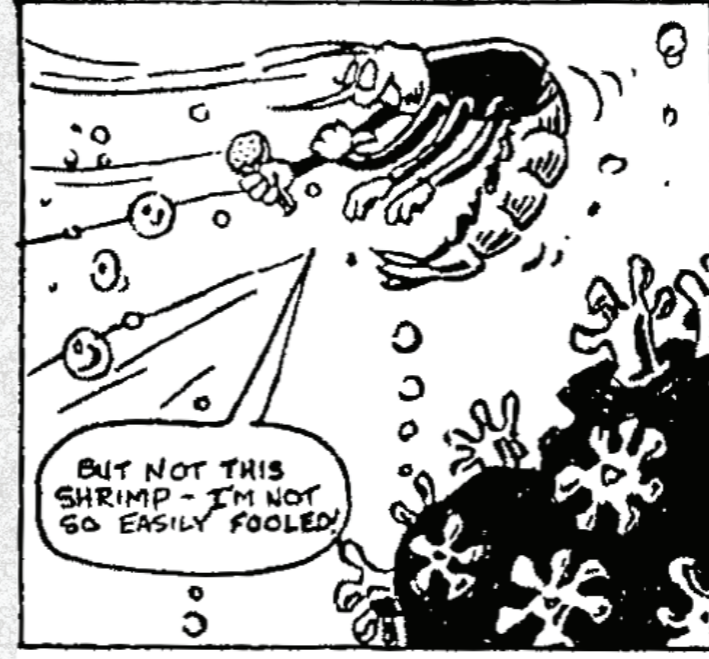

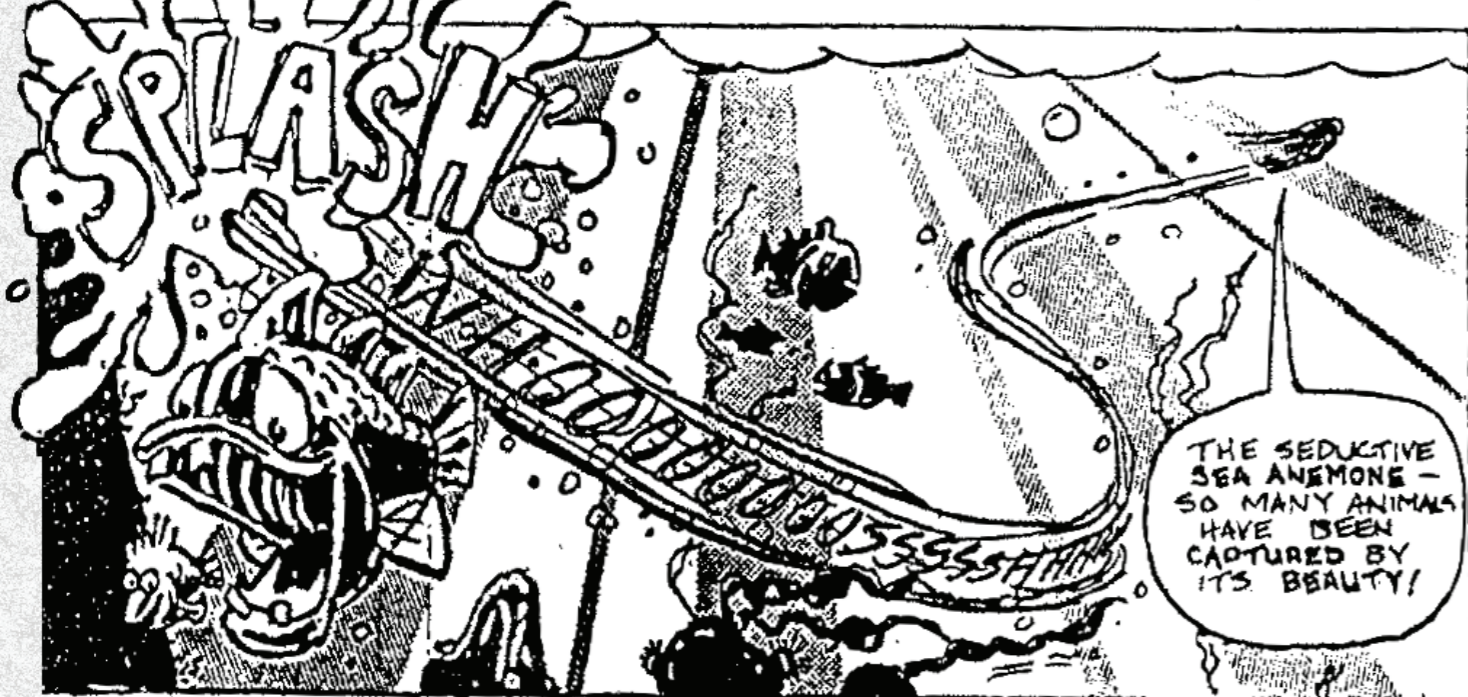

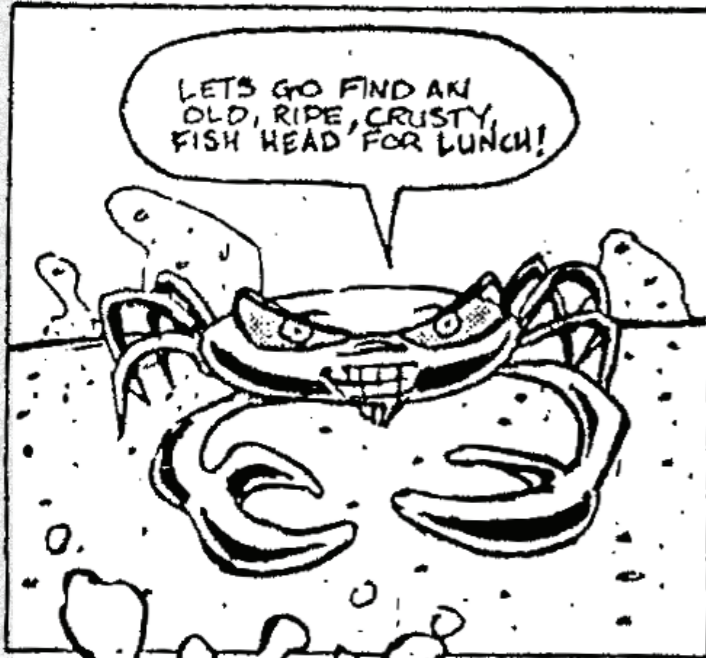

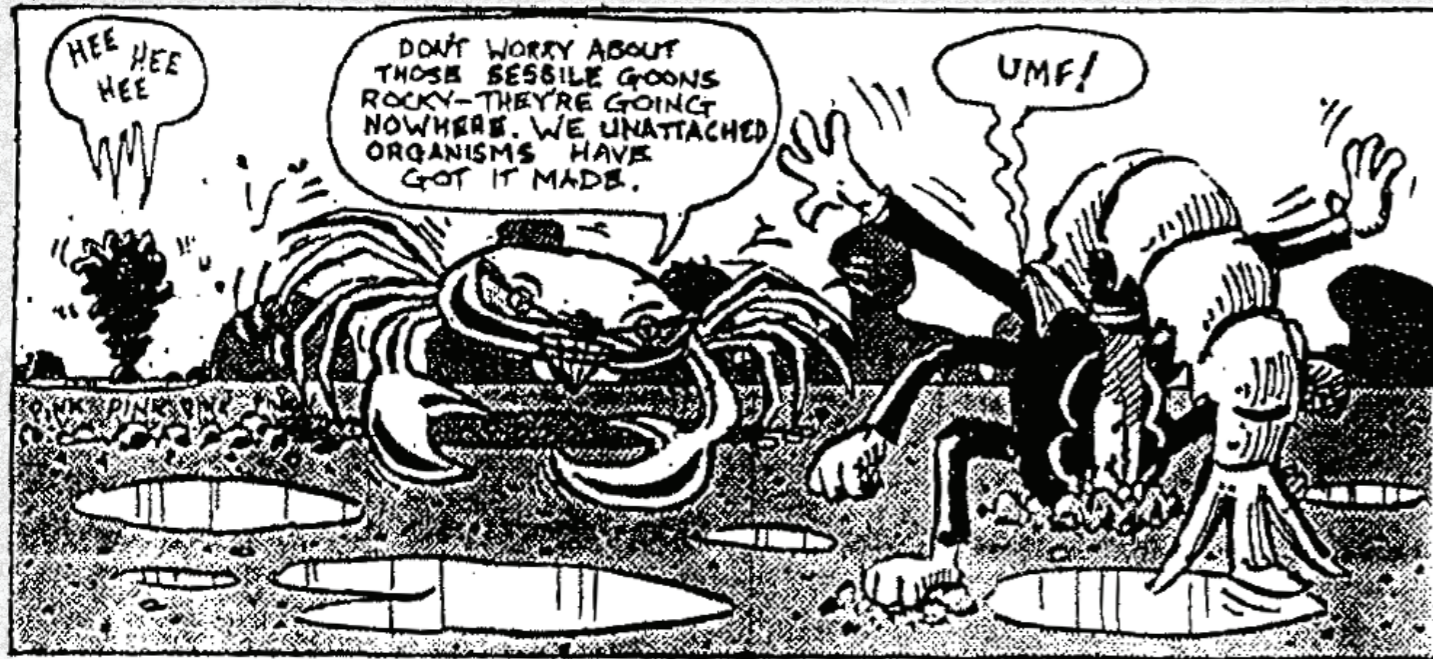

OH HEY BOB... THUMBS UP!

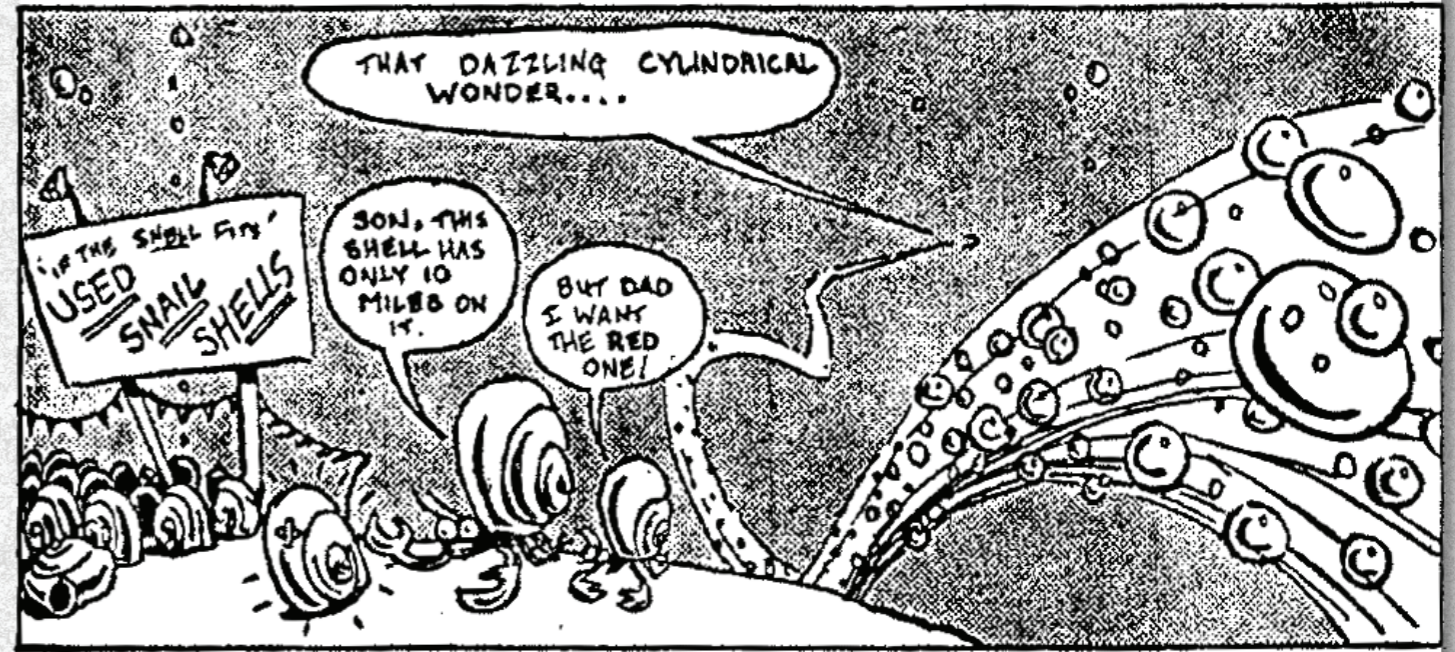

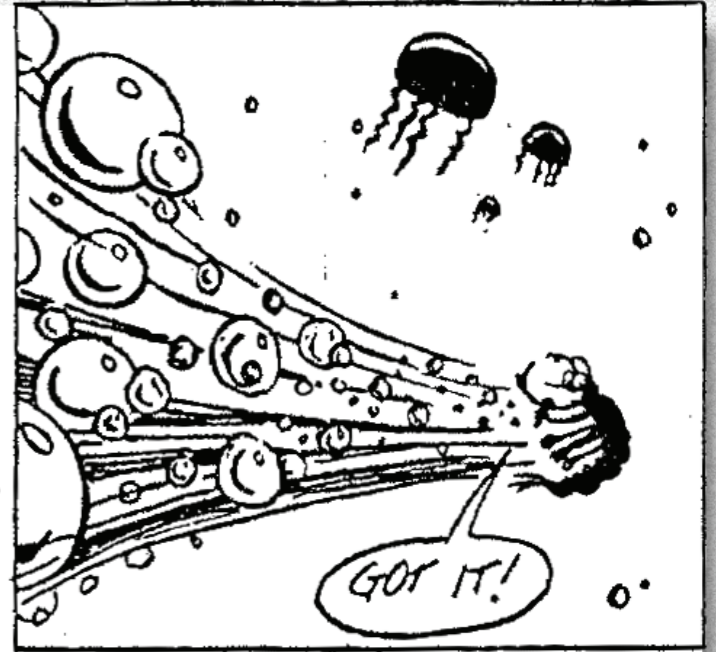

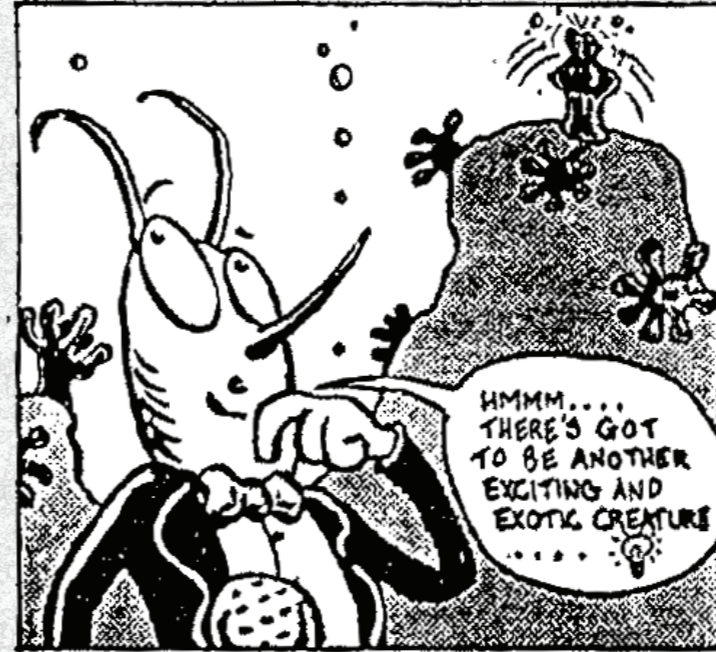

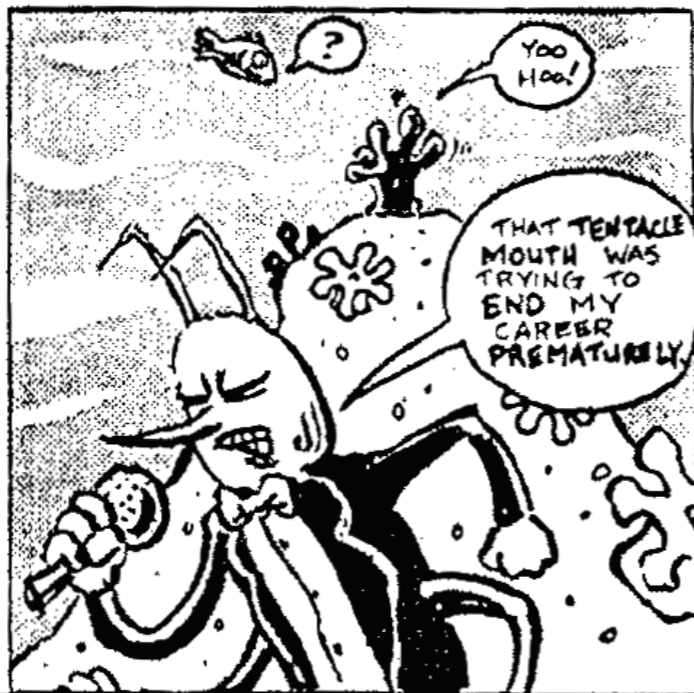

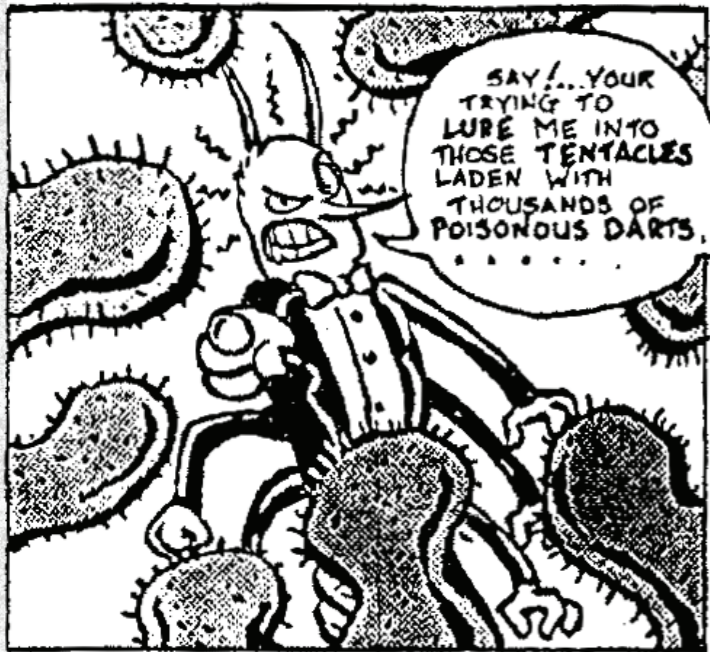

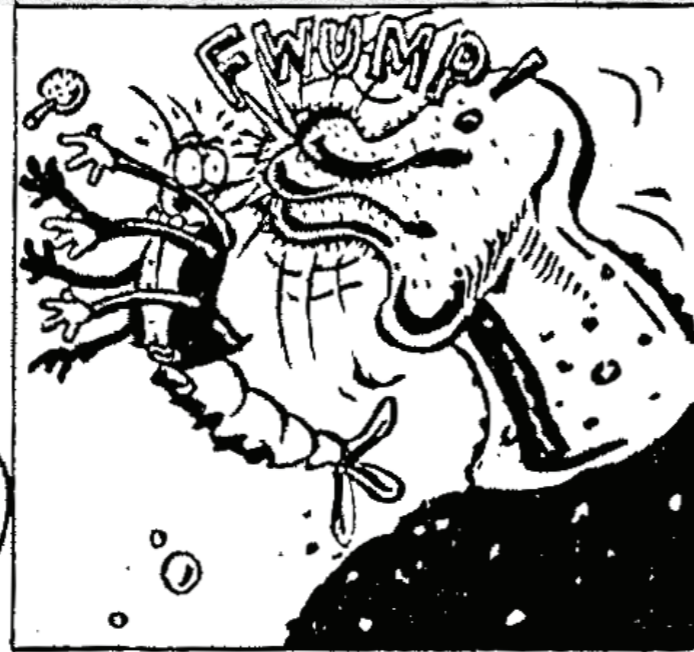

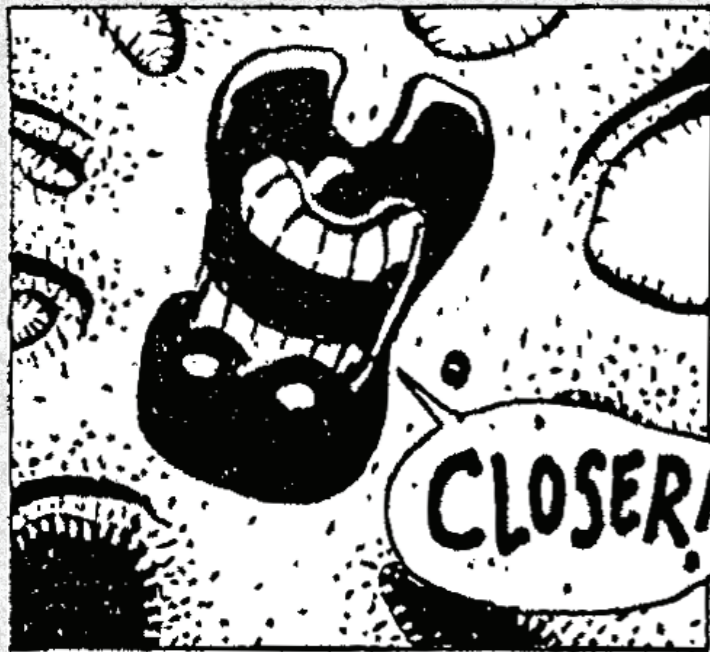

ABSOLUTELY BRILLIANT!

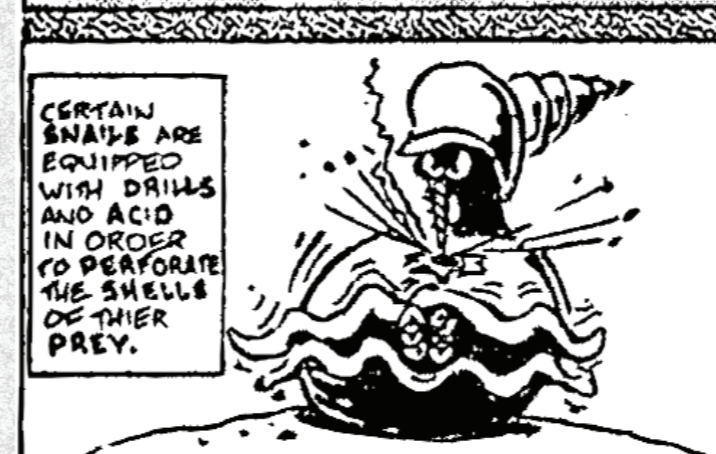

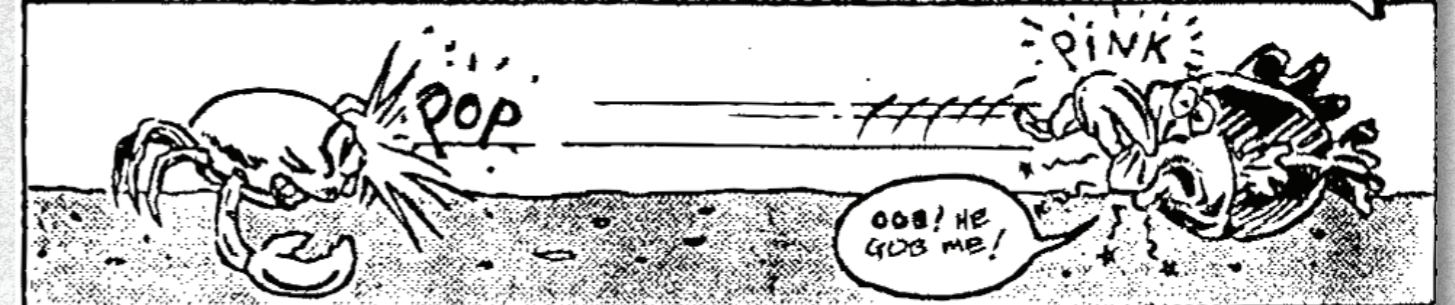

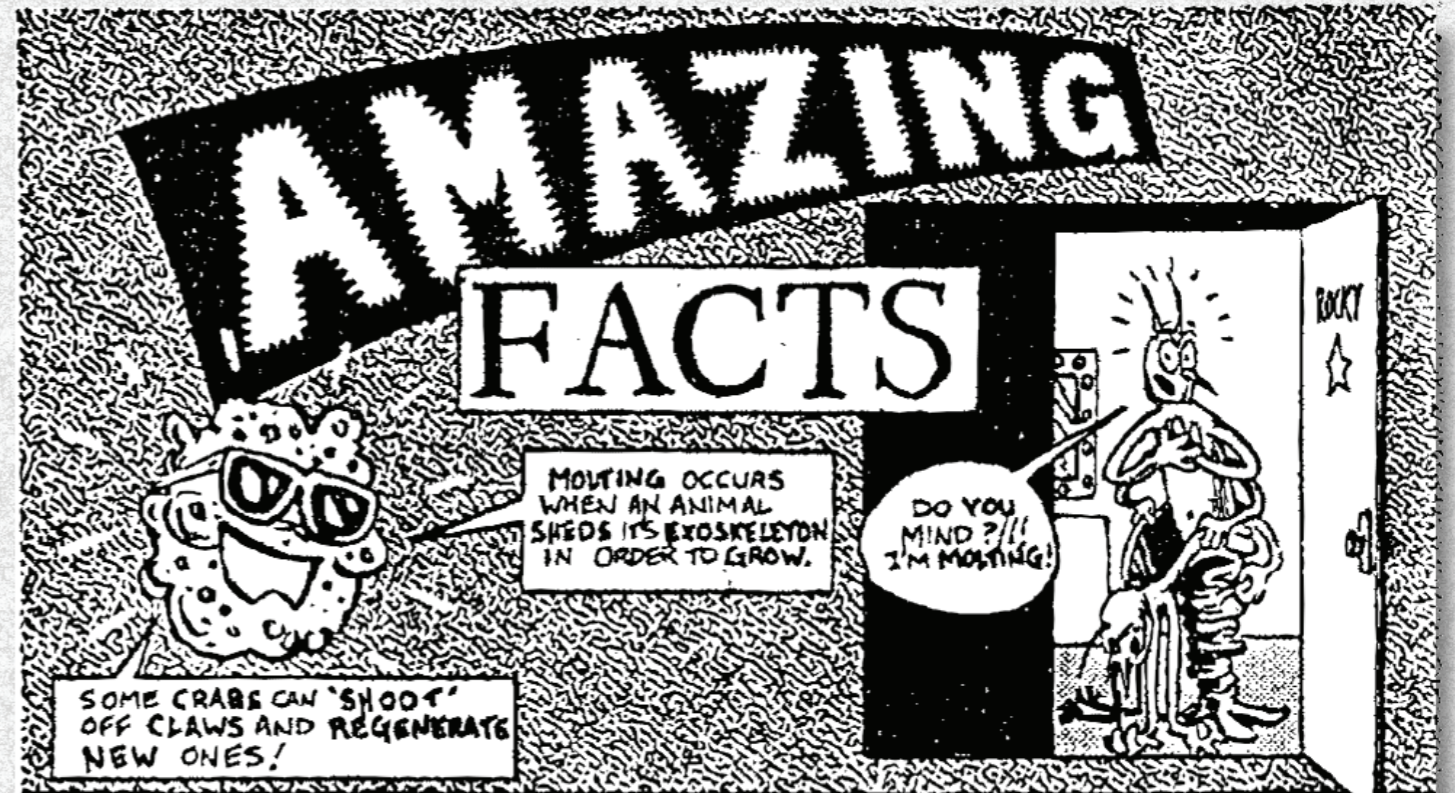

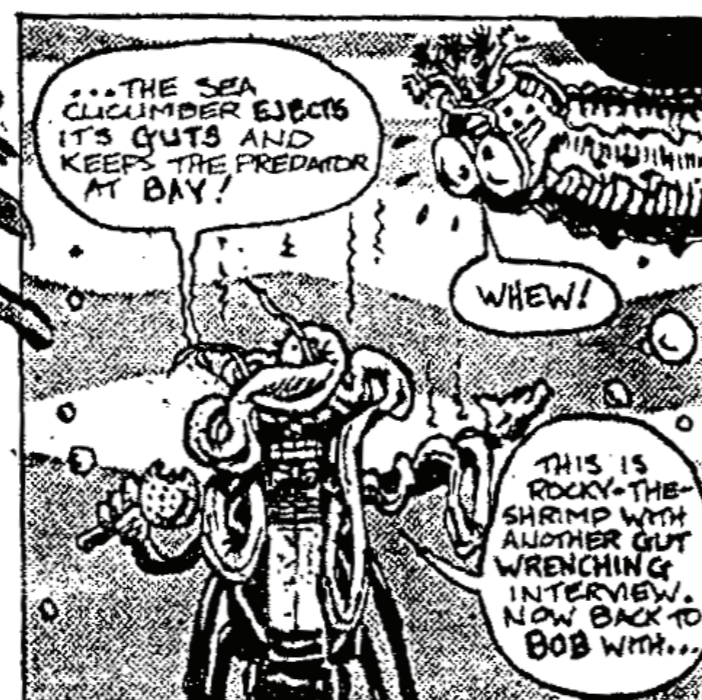

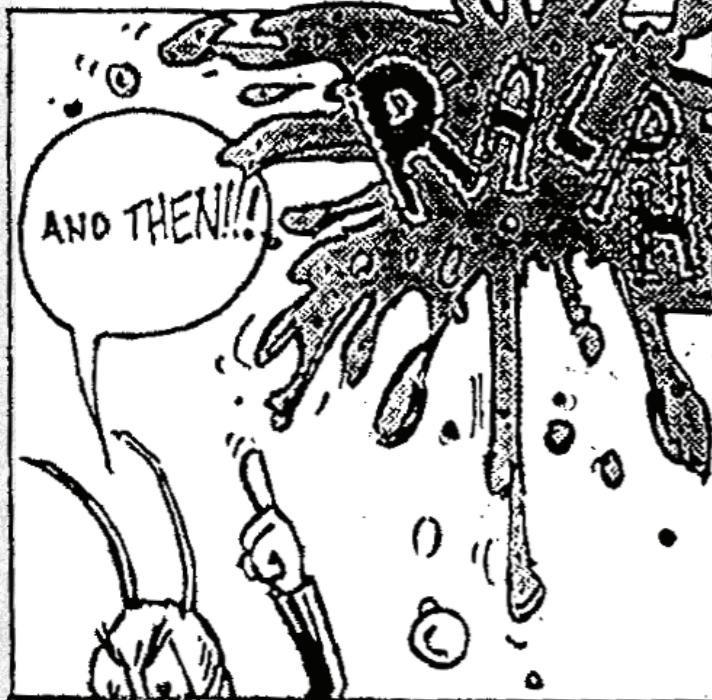

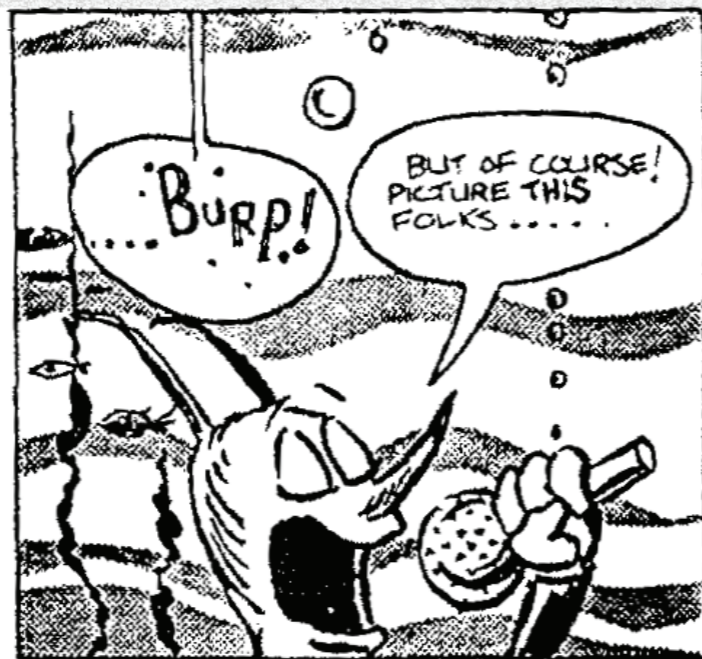

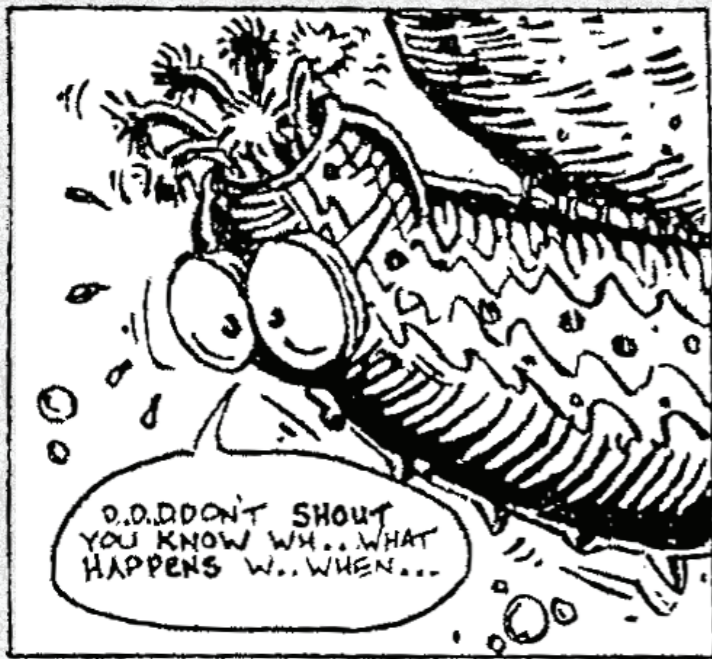

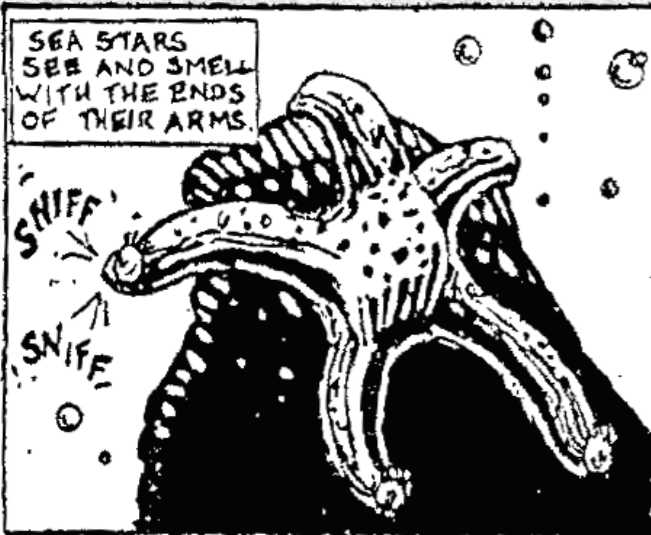

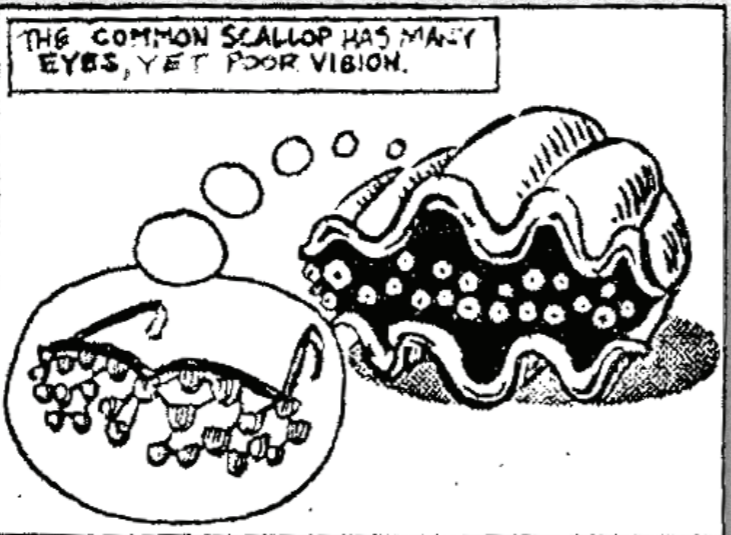

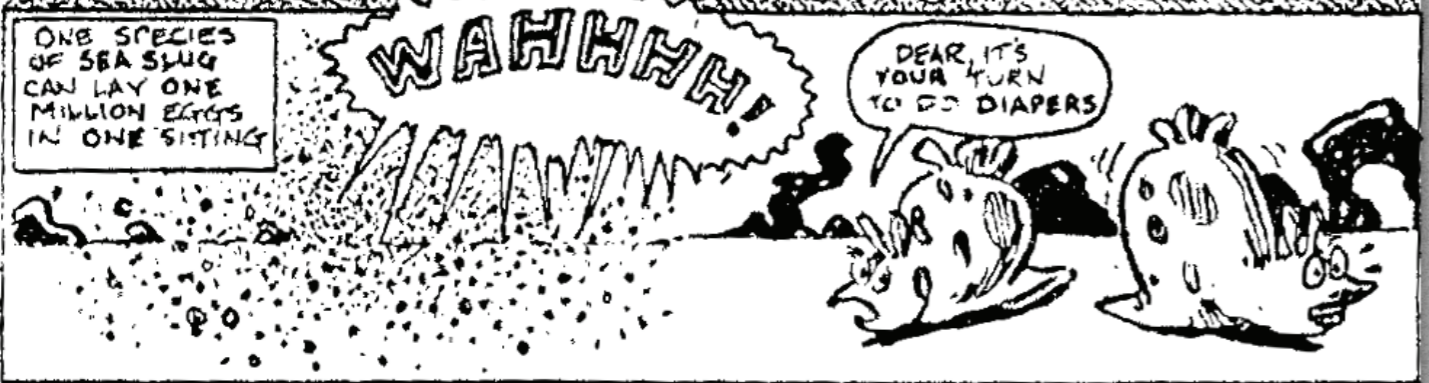

SEA STARS SEE AND SMELL WITH THE ENDS OF THEIR ARMS

SNIFF  
SNIFF

THE COMMON SCALLOP HAS MANY EYES, YET POOR VISION.

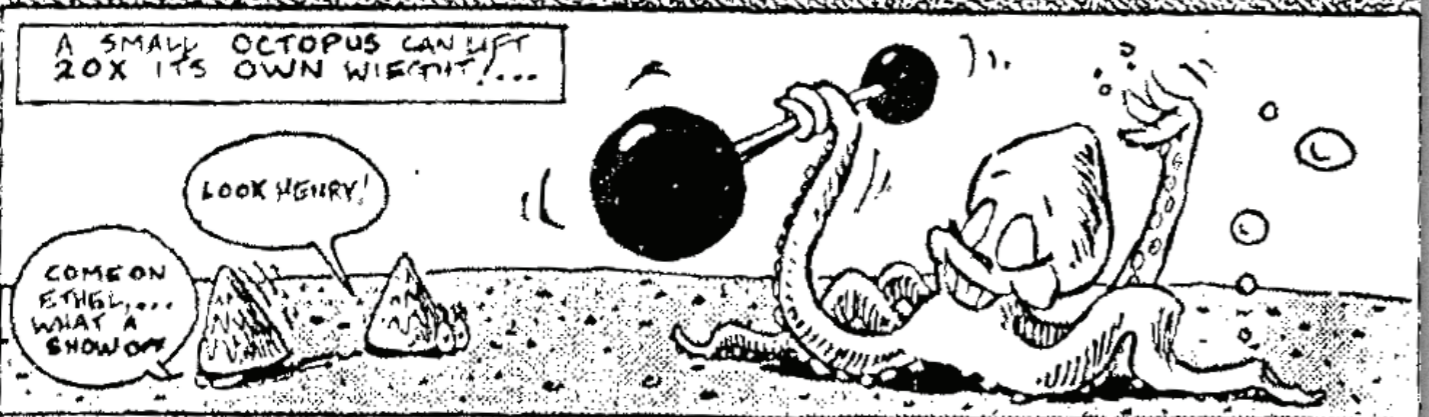

ONE SPECIES OF SEA SLUG CAN LAY ONE MILLION EGGS IN ONE SITTING

WAHHHH!

DEAR, IT'S YOUR TURN TO DO DIAPERS

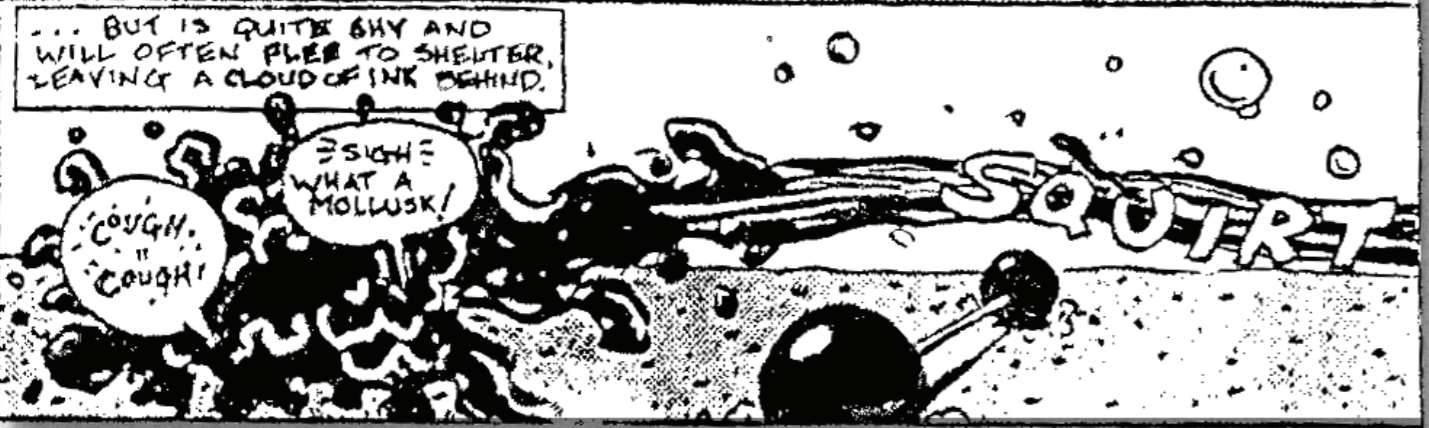

THE SEA ANEMONE CAN REPRODUCE BY SPLITTING IN TWO.

A SMALL OCTOPUS CAN LIFT 20X ITS OWN WEIGHT!...

LOOK HENRY!

COME ON ETHEL... WHAT A SHOW OFF

... BUT IS QUITE SHY AND WILL OFTEN FLEE TO SHELTER, LEAVING A CLOUD OF INK BEHIND.

ESGHE WHAT A MOLLUSK!

COUGH... COUGH!

SQUIRT

AND NOW...

# AMAZING ALGAEES

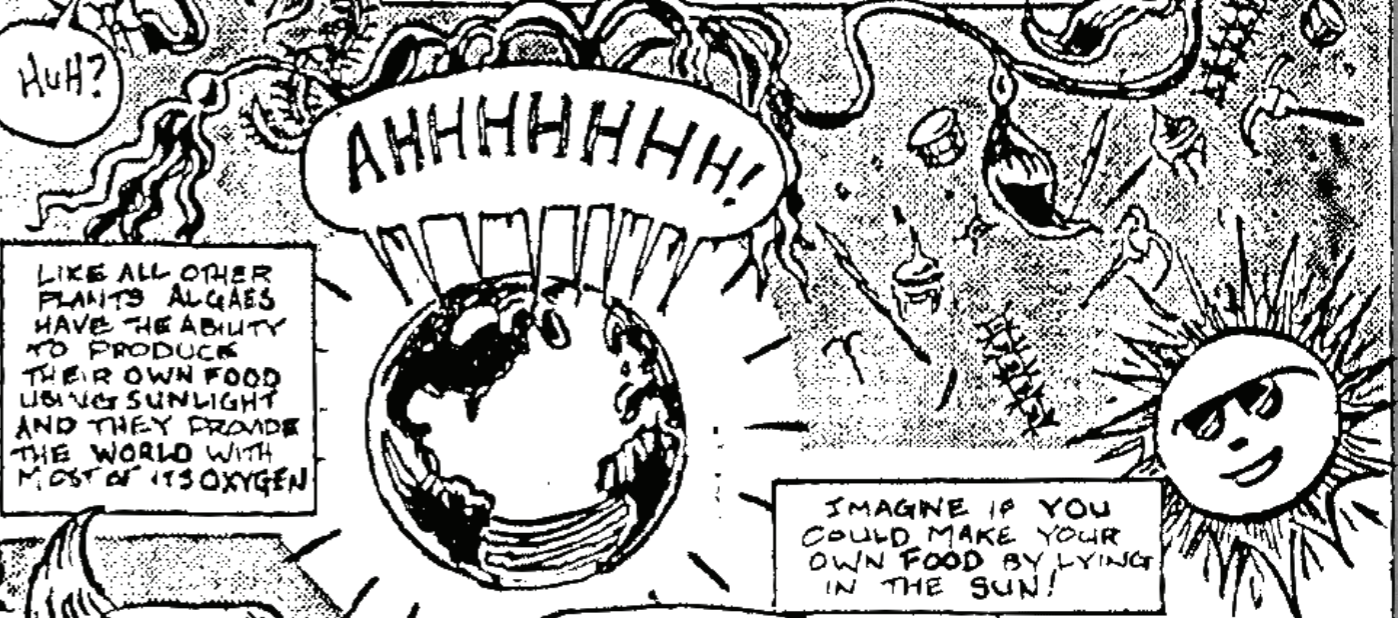

AA AH AH AH

AA AH AH AH

CHOOO

NO ROCKY NOT ALLERGIES!

ALGAEES... ARE 'SEAWEEEDS'. THEY RANGE IN SIZE FROM TINY ONE CELLED DRIFTERS (PHYTOPLANKTON) TO MULTICELLULAR GIANTS REACHING LENGTHS OF 100 FEET.

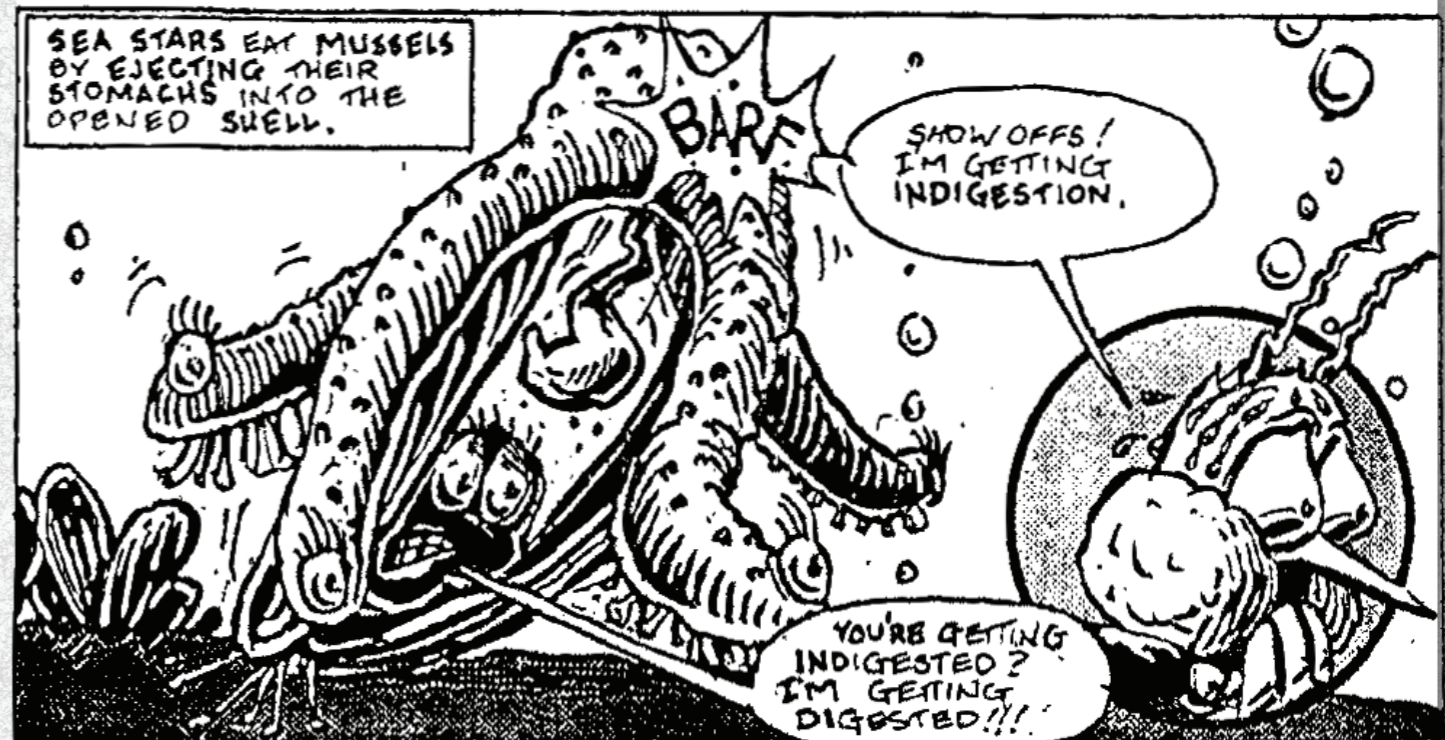

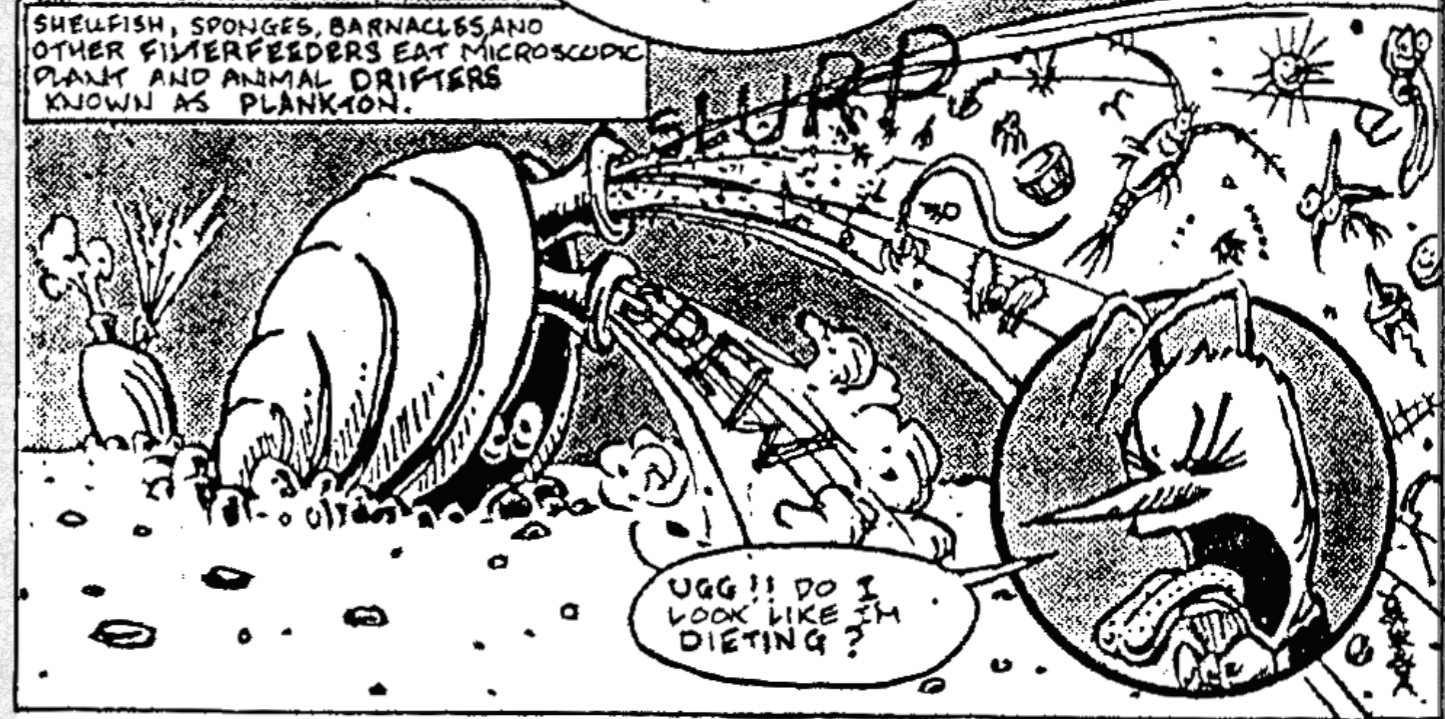

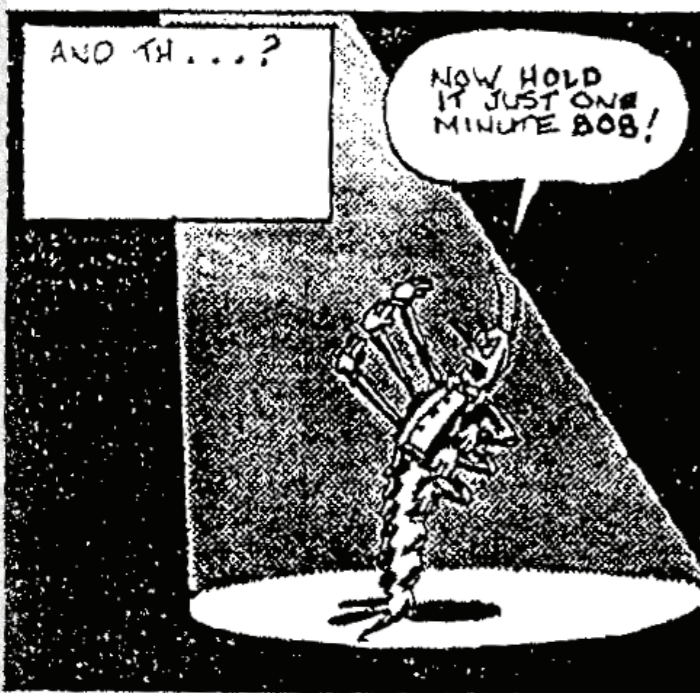

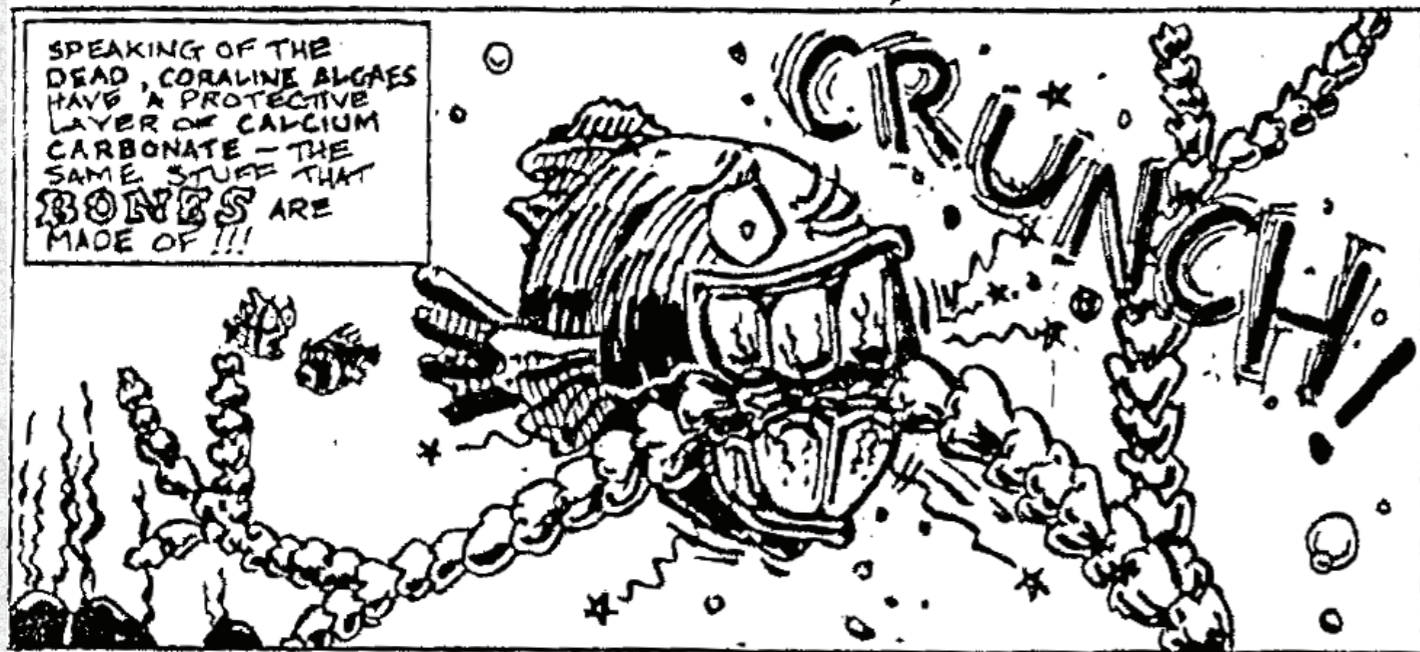

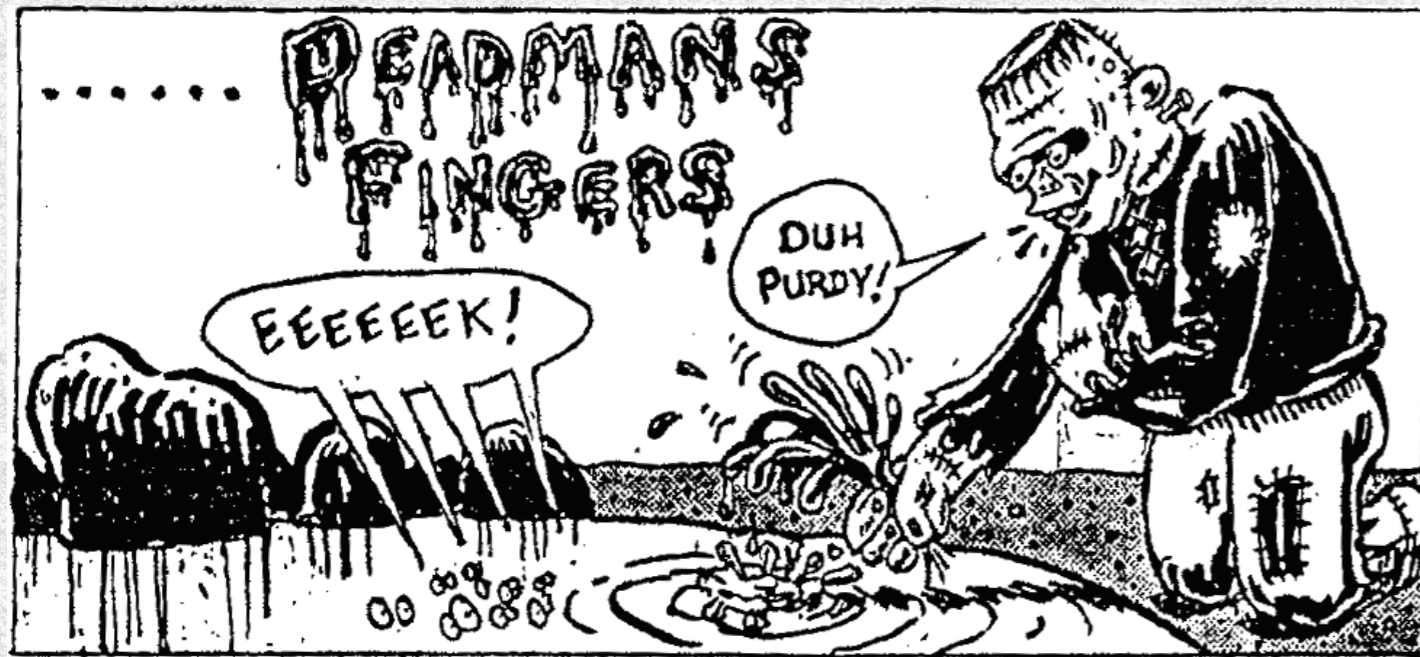

LIKE ALL OTHER PLANTS ALGAEES HAVE THE ABILITY TO PRODUCE THEIR OWN FOOD USING SUNLIGHT AND THEY PROVIDE THE WORLD WITH MOST OF ITS OXYGEN

AHHHHHH!

IMAGINE IF YOU COULD MAKE YOUR OWN FOOD BY LYING IN THE SUN!

GEE, I'M STUFFED

ALGAEES ARE REALLY FLEXIBLE AND RUBBERY - SO RUBBERY THAT ONE SPECIES IS KNOWN AS.....

FEATURING:

SEA STAR

SEA URCHIN

SEA CUCUMBER

TIDEPOL SCULPIN

LIMPET

SHORE CRAB

HERMIT CRAB

BARNACLE

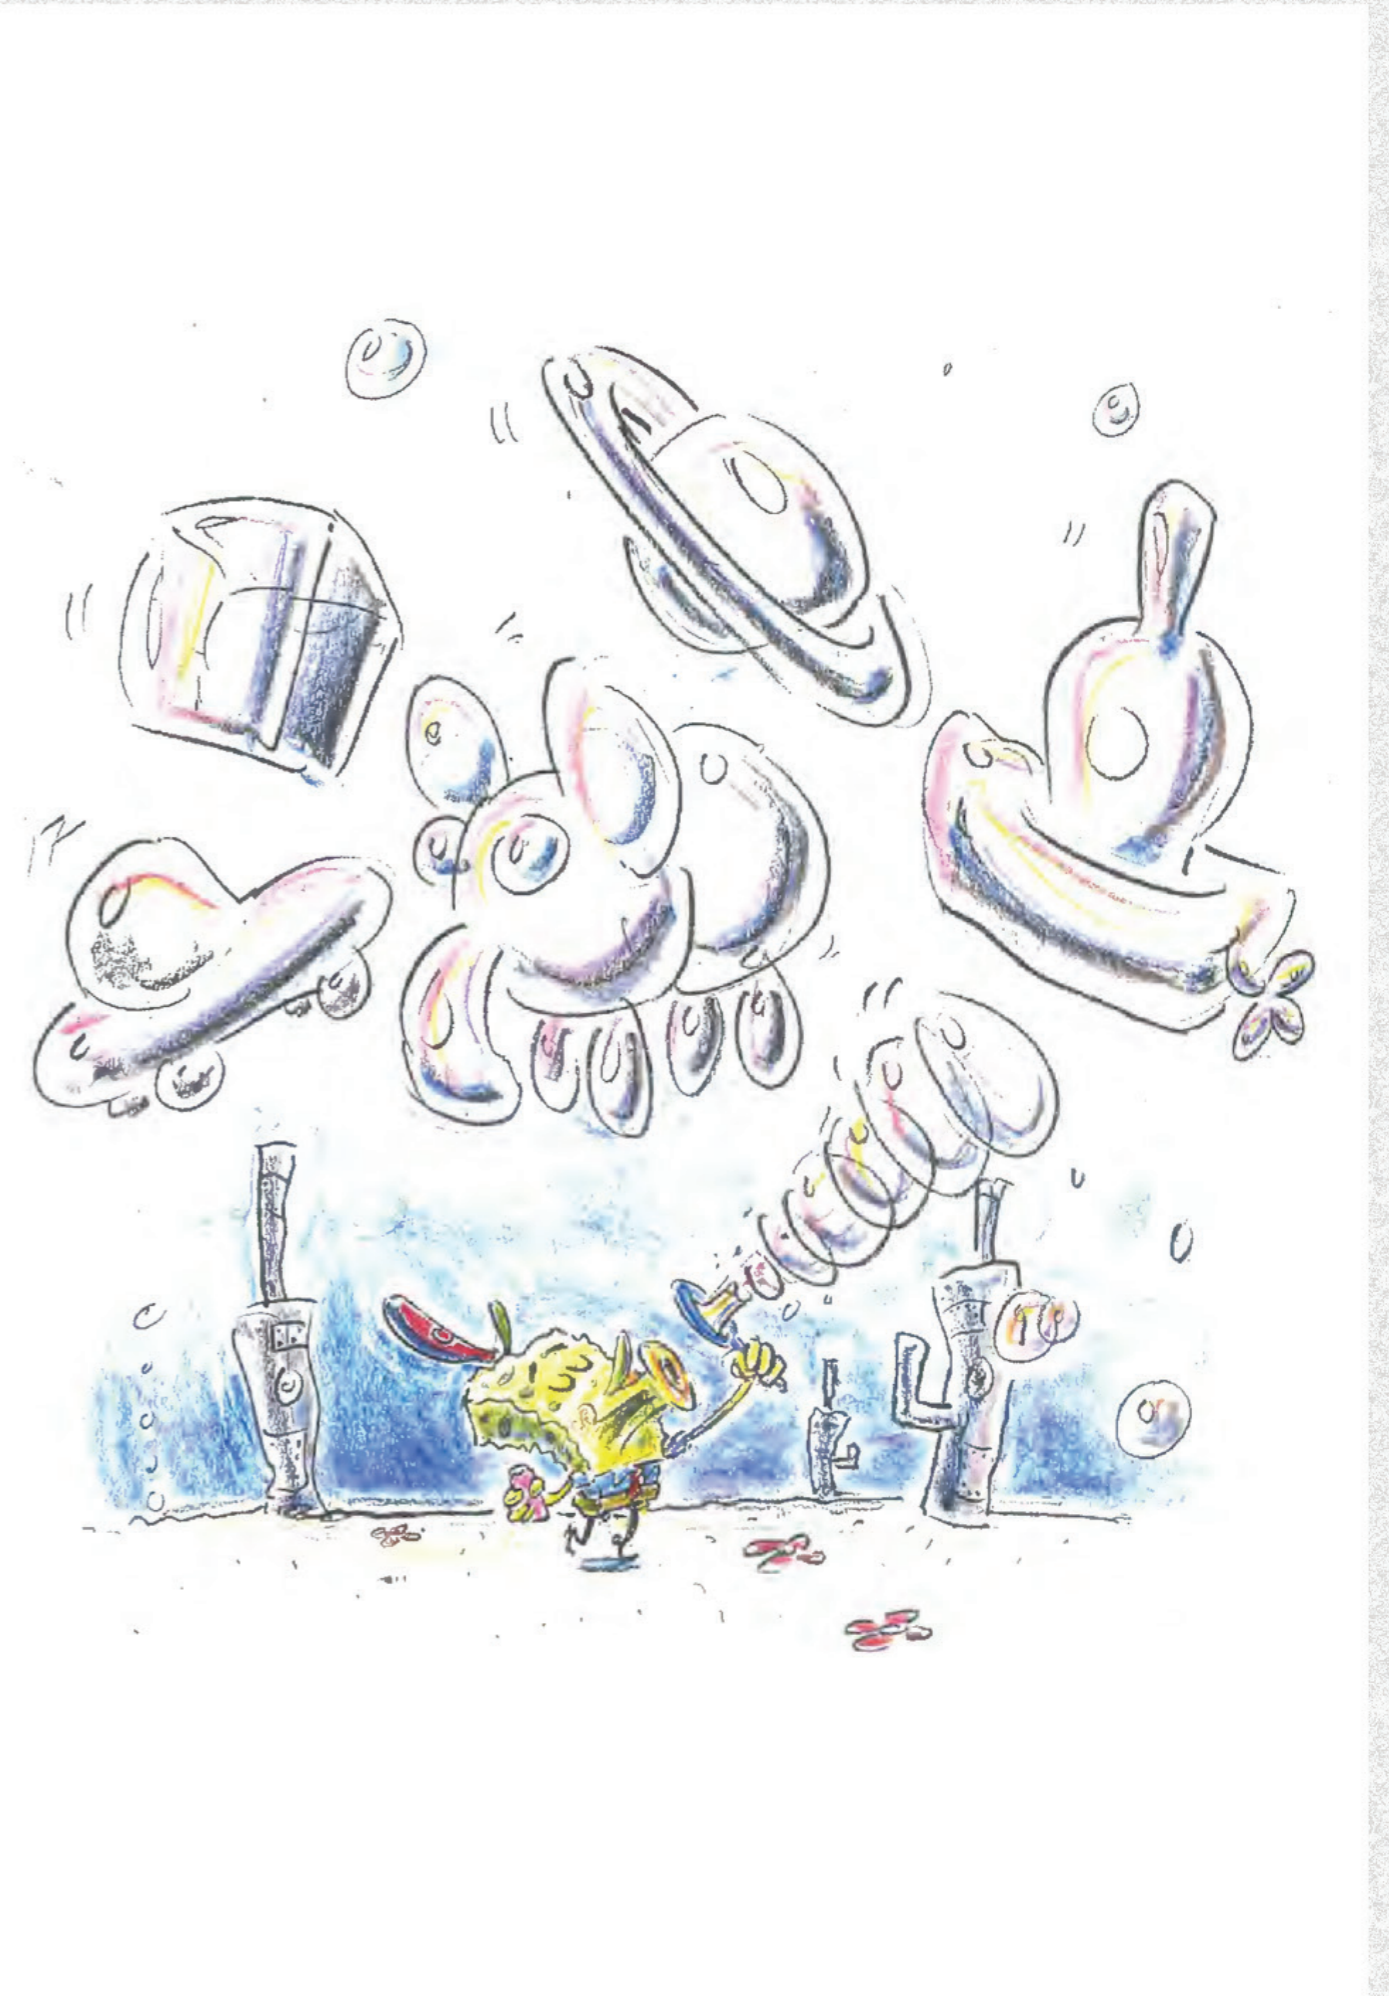

SEA ANEMONE

WORM

MUSSEL
